Art Unit: 1616

Claims 1-56 are pending in this application.

Claims 1-55 are generic to a plurality of disclosed patentably distinct species comprising

- (i) "peroxidic species" or reaction product from oxidation of alkene, wherein the alkene may be, for example, citronellol, geranylgeraniol or nerol,
- (ii) penetrating solvent such as DMSO or lecithin,
- (iii) dye containing chelated divalent or trivalent metal such as porphyrin, rose bengal, or neutral red, and
- (iv) aromatic redox compound such as benzoquinone or naphthoquinone.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of (i), (ii), (iii) and (iv), even though this requirement is traversed. For clarity, it is noted that election of (i) must indicate the specific "peroxidic species" or specific compound identification of the alkene.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1616

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
